LANGUAGE

English – Filipino

SOFT SKILLS

Problem solving

Adaptability and fast learning

Collaboration

Creativity

HARD SKILLS

Object Oriented Design

M.E.R.N. Stack

JavaScript

C#

Python

ABOUT ME

I am a software developer who is passionate on using technology to create a bridge between human and information. As a new graduate, I am seeking professional opportunities to apply my programming skills, problem solving abilities, and technical knowledge in building reliable and maintainable software.

EDUCATIONAL HISTORY

2024-2025   **CENTENNIAL COLLEGE**
Studied Software Engineering Technician

2022-2024   **ALVINDIA AGUSO SENIOR HIGH SCHOOL**
Studied TVL – Computer System Servicing

WORK HISTORY

APRIL-JULY 2025   **CODING INSTRUCTOR**

Served as a coding instructor, teaching core programming concepts including logic, algorithms, and problem solving. Supported students in developing structured thinking and practical coding skills across varying skill levels.

PROJECTS

CRAFTERIA - MERN STACK APP
A MERN stack web application designed for managing and sharing creative projects. It features user authentication, project creation and management, and a responsive interface, focusing on clean architecture, RESTful APIs, and maintainable full stack development.

C# PROFILE REST API CONSOLE APP
A C# console based REST API application for managing user profiles. It focuses on API design, data handling, and clean separation of concerns while reinforcing core C# concepts and backend development practices.

101.Projects – https://101projects-nextjs.vercel.app/
